Findings: Back in 2011, this stream was cataloged as 115-32-10250-2016. In a nominating error on my part, it was deleted and its number was assigned to the stream just up the highway. This little stream spills into the Chilkat and terminates at the highway.

Recommendations: Please re-list this stream and assign it #115-32-10250-2016 to reflect what should have been a route correction back in 2011.
